CAREER HISTORY

MACHOBEAR STUDIOS INC / LIV.RENT - VANCOUVER, BC Aug 2021 - Feb 2025
SOFTWARE DEVELOPER

- Developed complex features for a rental platform, including a multi-step application process that drove 201% increase in sales, along with implementing property management system and payment interfaces
- Built a comprehensive Client Management System with React-Admin that enabled $500M in sales (200 condo units) within a week, featuring automated pipeline tracking and workflow optimization
- Developed and maintained 13 marketing websites with integrated inquiry systems
- Contributed to company's design system by building reusable components, implementing type-strict styling, and ensuring W3C accessibility compliance
- Developed a custom email automation solution with Unlayer, featuring drag-and-drop template creation and scheduled campaign functionality for precision-targeted customer outreach
- Enhanced code quality through comprehensive testing implementation using Jest/Vite, including component unit tests, hooks test, and integration tests to ensure reliability

THE CODE GIANT - NEW WESTMINSTER, BC   Apr 2021 - Aug 2021

FULL STACK DEVELOPER

- Architected and deployed a data integration platform using React and Next.js, streamlining data synchronization across multiple business systems and improving overall system performance
- Developed a mobile-first snack delivery application using React Native and Commerce.js, successfully launching a commercial product
- Designed and integrated RESTful APIs for e-commerce functionality, creating a modular microservices architecture that reduced development time and technical overhead
- Enhanced customer satisfaction by implementing optimistic UI patterns, delivering a more responsive and fluid user experience while minimizing perceived loading times
- Built strong client relationships through proactive communication and agile methodologies, consistently meeting project deadlines

LAGARA COLLEGE - VANCOUVER, BC   Oct 2020- Apr 2021

FRONTEND DEVELOPER

- Led the remodeling of college program website using React, driving increased demand for website creation across multiple departments
- Enhanced user experience by implementing Next.js, resulting in significant improvement
- Developed a scalable content management system through API integration, enabling non-technical staff to update website content while maintaining design consistency
- Enhanced customer satisfaction by implementing optimistic UI patterns, delivering a more responsive and fluid user experience while minimizing perceived loading times

IMPRO KIDS TOKYO - TOKYO, JAPAN   Oct 2020

TECHNICAL ASSISTANT (REMOTE)

- Developed an automated notification system integrating Slack with Google Forms, streamlining sales order processing and survey responses while enhancing customer service response times
