Ken Tauchi

Software Developer

Frontend Developer with 5+ years of experience building scalable React Native and React applications. Specialized in architectural design, event-driven systems, and real-time data synchronization. Proven ability to refactor legacy codebases into modern, modular architectures while maintaining production reliability. Passionate about clean code, design systems, and leveraging AI tools to enhance development velocity.

WORK EXPERIENCE

Sfotware Developer Mar2025 - Present
Nextgen Kitchens Inc - Vancouver, BC

- **Refactored legacy React Native codebase** and led comprehensive **architectural overhaul from scratch** – replaced problematic patterns with **event-driven design** enabling scalable feature development.
- Architected modular system with **event-driven inter-module communication** – isolated each feature into independent modules with zero tight coupling, enabling rapid additions without cascading rewrites.
- Built **React Query** cache strategy with event-driven invalidation for real-time sync (vendor updates → customer UI); implemented proactive scheduled order validation monitoring restaurant/menu/modifier availability.
- Handled **500+ daily food orders** at scale while delivering improved **design system** and **comprehensive testing infrastructure** (React Native Testing Library/Playwright) from modular codebase to end-to-end.
- Built real-time order boards for four operator personas over a Redis/Firestore + SSE pipeline, with Recall, Hold/Resume, prioritization, prep-tracking, and ETA workflows wired to typed Firebase Cloud Functions.
- Leveraged **AI coding** assistants to accelerate development velocity – code generation, refactoring, and testing workflows while maintaining architecture standards.

Software Developer Aug2021-Feb2025
Machobear Studios Inc / liv.rent - Vancouver, BC

- Constructed an iterative approach for implementing a robust multistep rental application methodology using **React Query**; achieved consistent daily submission increases which led to **a significant sales increase by 200%**.
- Streamlined application performance by migrating state management from **Redux** to **React Query**, optimizing data fetching processes which resulted in **30% faster load times** and enhanced user experience for **over 20,000 monthly users**.

SKILLS

Frontend Development:
- React
- Typescript
- Javascript
- Redux
- Next.js
- React Native
- Headless CMS
- HTML & CSS
- PHP

UI & Styling Library:
- Shadcn/UI
- Vanilla Extract CSS
- Tailwind
- Material UI
- Styled Components
- Framer Motion

Testing & Debugging:
- Vitest
- Jest
- React Testing Library
- Cypress

Backend & APIs:
- GraphQL
- PostgreSQL
- Prisma
- Drizzle
- Node.js
- Express.js
- REST APIs

Others:
- Git / Github / Gitlab
- AWS
- Vercel
- Agile Development

- Engineered a **Client Management System** with **React-Admin, Shadcn/UI, and Tailwind**, facilitating **$500M in sales** (200 condo units) within a week.
-
- Developed and maintained **13 marketing websites** with **integrated inquiry systems**, leveraging **React** and **Styled Components** for a scalable and maintainable codebase.

- Developed a **comprehensive library of reusable UI components** that enhanced development **efficiency by 25%**, facilitating quicker deployment cycles for new features, while ensuring compliance with W3C accessibility standards across 4 diverse web applications.

- Built a custom email automation system with **React** and **Unlayer**, **significantly enhancing marketing efficiency** through drag-and-drop template creation and scheduled campaign execution.

- Strengthened code reliability by implementing comprehensive testing strategies using **Jest, Vitest**, and **React Testing Library, reducing production bugs by 30%.**

Frontend Developer Apr 2021 – Aug 2021
The Code Giant – New Westminster, BC

- Led and deployed a data integration platform using **React** and **Next.js**, streamlining data synchronization across multiple business systems and improving overall system performance.

- Developed an intuitive user interface for a **snack delivery app using React Native**, resulting in seamless navigation that contributed to attracting approximately **hundreds active users within a week post-launch**.

- Crafted robust **RESTful APIs** designed specifically for e-commerce transactions; enabled seamless integration with third-party services, which **reduced development cost by over 50%** while enhancing user experience.

- Enhanced customer satisfaction by implementing **optimistic UI** patterns, delivering a more responsive and fluid user experience while minimizing perceived loading times.

Frontend Developer Oct 2020 – Apr 2021
Langara College – Vancouver, BC

- Orchestrated the **remodelling of Langara College's program site** via **React and Next.js**; this initiative led to heightened interest across three different departments for web creation projects and improved user retention metrics.

- Enhanced user experience by implementing **Next.js**, resulting in a significant improvement in page load times and engagement.

- Developed a **scalable content management system (CMS)** through API integration, enabling non-technical staff to update website content while maintaining design consistency.

- Improved performance by integrating **server-side rendering (SSR)** and **static site generation (SSG)** for faster page loads.

EDUCATION

Langara College
Post-Degree Diploma
Web and Mobile App Development
Vancouver, BC
Jan 2020 - Apr 2021
Awards: Dean’s Honour Roll (in all semesters)

American University
Bachelor of Business Administration Dual Degree Program
Majored in Marketing
Washington, DC
Aug 2010 - Jul 2014

Ritsumeikan University
Bachelor of Business Administration Dual Degree Program
Majored in Marketing
Kyoto, Japan
Apr 2010 - Dec 2014

CERTIFICATIONS

• HTML, CSS,and Javascript for Web Developers certified by Johns Hopkins University

• PHP & MySQL Web Server Side Programming Online Course certified by Udemy

•IELTS General - Score 8.0
